

➔ DATASHEET: UniPrint Infinity

## ➔ UniPrint Infinity Cloud based Print Management

**Save up to 40% of your print costs and reduce helpdesk calls by up to 75%.**

UniPrint Infinity is a PDF driven print management solution that optimises printer output. Delivering fast and reliable printing, UniPrint seamlessly works to improve efficiency and productivity.

UniPrint Infinity provides organisations with one cloud native solution for all of their printing requirements. Eliminating the need for multiple solutions and the costs associated such as support, training and maintenance.

UniPrint is one of the most versatile print driver platforms on the market, compatible with almost any device, allowing users to print at their convenience. It can be deployed through remote sessions using: Cloud computing, RDS, Citrix and VMware Horizon View.

- Cloud
- VDI
- Server-based
- Mobile
- Server-less
- Traditional environment

The centralised management console gives you complete control over your printing. Using print profiles to apply restrictions and track output.

UniPrint Infinity provides effective print management allowing organisations to greatly reduce costs and increase productivity.
