

Safer Return-to-Work and Business Continuity solutions from Advanced UK

Technology for your Remote Employees

In the sudden shift to having employees work from home, businesses are at risk of falling foul of the Health & Safety at Work Act: your duties to protect your staff don't end when they're away from the office.

Are your staff equipped adequately for their tasks? Do they have printers, telephones, or appropriate chairs?

What of confidential documents? Can they be destroyed correctly, or are they a data breach waiting to happen?

YOUR LEGAL RESPONSIBILITIES

*The **Management of Health and Safety at Work Regulations (1999)** require you to perform suitable and sufficient risk assessments of the work activities carried out by your staff, including homeworkers.*

For example, consider if your staff have a swivel chair, and do they have the correct tools and resources for the work expected?

Make Advanced UK your one-stop-shop to enable your remote workers to be safe, efficient, and productive
