

Safer Return-to-Work and Business Continuity solutions from Advanced UK

Temperature Measurement & Access Control

We're helping businesses comply with the H&S Executive and Government guidelines for a safe return to work. Clients are deploying our smart non-intrusive and GDPR/privacy-compliant thermal body temperature measurement systems.

Delivered and installed by our specialist teams, you can be up and running in hours, able to monitor up to 30 people simultaneously as they enter your office, site, factory etc.

YOUR LEGAL RESPONSIBILITIES

*The **Management of Health and Safety at Work Regulations (1999)** require you to perform suitable and sufficient risk assessments, and to take all reasonable precautions to protect their health.*

Our thermal body temperature measurement systems are the same ones as being deployed at the nation's airports, and they're incredibly affordable.

Give increased confidence to your staff and customers as they visit your facilities, whether commercial, retail, or in a large office

Thermal Measurement

Combined with our innDex on-site staffing management platform, our Thermal Body Temperature Measurement Systems screen staff to identify and alert body temperature irregularities which suggest a risk of fever, highlighting possible COVID-19 cases.

The temperature measurement camera can measure a person's temperature at a high accuracy and in real time.

It pinpoints and tracks people with a high temperature in crowded public areas. It's already used widely in places such as HM Customs, airports, hospitals and construction sites for inspection during quarantine.

Key Features

- ✓ Rent or purchase options
- ✓ The system can be deployed in a matter of days;
- ✓ Installation and training team follow BUILD UK's advice on social distancing;
- ✓ Camera installed at the site entrance: screen the workforce as they arrive at your facilities;
- ✓ Includes monitor with remote access;
